History of Rocketry and Astronautics

Proceedings of the Forty-Third History Symposium of the International Academy of Astronautics

Daejeon, Republic of Korea, 2009

Christophe Rothmund, Volume Editor

Rick W. Sturdevant, Series Editor

AAS History Series, Volume 40
A Supplement to Advances in the Astronautical Sciences

IAA History Symposia, Volume 28
Contents

Foreword ................................................................. vii
Preface ................................................................. ix

PART I
Biographies and Memoirs

Chapter 1. The 100th Anniversary of the Birthday of the Designer of Space Planes, Gleb Lozino-Lozinskiy, Vladimir F. Prisniakov and Vladimir A. Zadontsev .................................................. 3

Chapter 2. Minoru Oda and His Pioneering Role in Space Science in Japan, Yasunori Matogawa .................................................. 27

PART II
Space Policy

Chapter 3. The Israeli Space Effort—Logic and Motivations, Deganit Paikowsky .................................................. 41

Chapter 4. What Explains China’s Comprehensive but Uneven Aerospace Development?, Andrew Erickson .................................................. 55

Chapter 5. Japanese Space Policy During the 1980s: A Balance Between Autonomy and International Cooperation, Hirotaka Watanabe .................................................. 65

### PART III
Corporate and Technical Histories

Chapter 7. The XLR-99 Pioneer Rocket Engine—Powering the X-15 Rocket Plane into Air and Space in the 1960s,
Frank H. Winter and Philippe Cosyn .................................................. 105

Chapter 8. The Diamant-A Launch Vehicle First Stage Propulsion System:
A Liquid-Propellant Engine Fitted with a Solid-Propellant Gas Generator,
Christophe Rothmund ................................................................. 137

Chapter 9. The History of Space Science in Ukraine: Rocket Engines and
Power Plants,
Vladimir F. Prisniakov .............................................................. 157

Chapter 10. The Most Powerful Missile, “Satan,” and Its Founders,
Vladimir P. Platonov and Vladimir F. Prisniakov ............................. 183

Chapter 11. An Appreciation of the Progress in Navigation from the
Perspective of Kalman Filter,
Mudambi R. Ananthasayanam ......................................................... 209

Chapter 12. Historical Evolution of Space Systems,
Svenja Stellmann, Daniel Schubert and Andre Weiss ...................... 241

### PART IV
Korean Space History

Chapter 13. The History of Korean Rockets (1377–2009)—From Ju-hwa
to KSLV-1,
Yeon Seok Chae ........................................................................... 267

Chapter 14. Study on the 15th Century Korean Rocket, Dae-Sin-Gi-Jeon,
Hwanil Huh, Yong Wu Lee and Yeon Seok Chae ............................... 281

Chapter 15. The History of the Korea Multipurpose Satellite Program,
Sang-Ryool Lee and Joo-Jin Lee .................................................... 293

Chapter 16. The DPRK’s Road to Space—A Brief History,
Philippe Cosyn ............................................................................. 305

Index .................................................................................................. 325

AAS History Series ........................................................................... 330
